Correction

Probiotics for gastrointestinal disorders

In our article Probiotics for gastrointestinal disorders (DTB 2004;42:85-8), we incorrectly quoted a remission rate of 15% for patients with pouchitis taking the probiotic product VSL#3. It should have stated that 85% of patients taking VSL#3 remained in remission compared with none (p<0.001)\(^1\) or 6% (p<0.0001)\(^2\) of those taking a placebo. The error does not affect the article’s Conclusion.
