

Correction

In the article 'An update on the management of gout' (*DTB* 2018;56:9–12), the following statement is incorrect: 'Prophylaxis should be considered when starting ULT, and based on the evidence from two recent systematic reviews, BSR recommends **colchicine 500mg** once or twice daily for up to 6 months.'

The sentence should read: 'Prophylaxis should be considered when starting ULT, and based on the evidence from two recent systematic reviews, BSR recommends **colchicine 0.5mg** once or twice daily for up to 6 months.'
